

# Fast Wax

## General Purpose Wax Thermal Transfer Ribbons

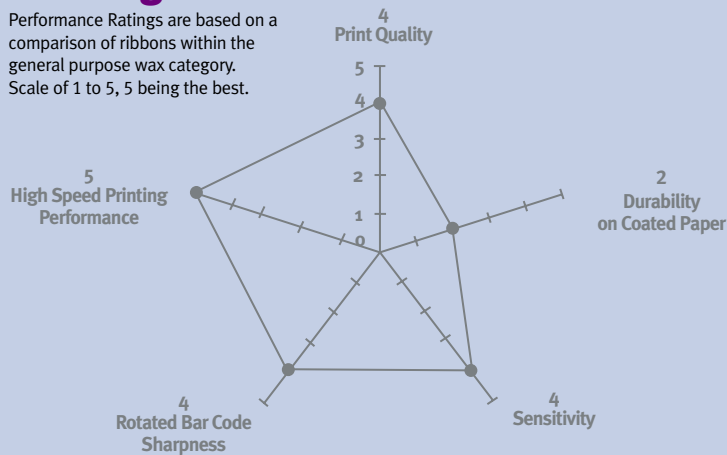

Fast Wax is designed to handle basic general purpose applications with ease. It is an extremely forgiving soft wax that prints well on uncoated tag and label stocks as well as coated. As its name implies, it can handle print speeds up to and including 12 IPS with no trouble at all. Fast Wax also prints at energy levels well below most competitive wax ribbons, providing the added benefit of extended printhead life. When a reliable, solid-performing wax ribbon is needed for tag and label applications that don't require the durability of a resin enhanced wax, Fast Wax is the ribbon of choice.

### Recommended Media

- \* Uncoated paper tag and label stocks
- \* Coated paper tag and label stocks

### Star Diagram

Performance Ratings are based on a comparison of ribbons within the general purpose wax category. Scale of 1 to 5, 5 being the best.

### Technical Specifications

Maximum Print Speed:	.12 IPS
Film Thickness:	4.5 Microns
Total Ribbon Thickness:	7.5 Microns
Transmission Density:	1.85 MacBeth Scale
Ink Melting Point:	.64°C/147°F

### Applications

- \* General purpose labeling
- \* Shipping, warehousing, and receiving labeling
- \* Retail tag and label applications
- \* Apparel product labeling
- \* Compliance labeling
